

## SUPERVISOR'S REPORT FOR JUNE

This report will be a little shorter than usual since I took some time off the first week in June to go to South Carolina for my granddaughter's graduation from high school. Tuesday, after my return, I sat in on our weekly meeting with Mr. Lattie and then attended the ribbon cutting for the opening of the Village Cleaners on Hill Road. Then, in the afternoon Mr. Dunnill, Maria Maclean, Kirk and I met with a group from Genesys regarding their future plans for growth. On Wednesday Maria Hobson and I met with June Energy, an incubator energy group from Kettering, in the morning and with a group of professors from Kettering who are working with us on our "Electric Exit" program. On Saturday, I participated in Grand Blanc's Relay for Life, a cause that is special to me since I am a 'survivor'.

Tuesday of the next week started with a Roads and Bridges meeting and then back to the office for our weekly meeting with Mr. Lattie. That afternoon, Kirk, Maria Hobson, and I met with Judy Schroeder from Consumers on our "Electric Exit" program. Wednesday morning was the Superintendents' breakfast where the main discussion was about the bonding proposal put forth by the Road Commission, ditching and chloriding. Water and Waste meeting was also on Wednesday where we discussed an update on the pipeline and the latest increase in cost being passed on from Detroit. The minutes and agendas for the meeting of the Road Commission, Water and Waste can be found on links at the bottom of the page of my monthly report. The Homeowners' Association meeting was that night and it was the first night for the new officers. The main discussion centered around getting the word out to homeowner groups to attend the meetings, potential by-laws and future agendas. It was decided that the group would not meet in July, but that some of the members would try to attend a successful homeowners group in Farmington. The suggested agenda for August was for the various homeowners' representatives to bring copies of by-law, fees, and activities in the various subdivisions to compare notes. Thursday, a group of us from the township attended the funeral of the Maria Hobson's brother. That night was the summer picnic for Genesee County Township Officials at Mount Morris. Friday morning was a pre-arbitration meeting with the labor attorney before the 312 arbitration with the patrol officers.

The next week Tuesday after our usual meeting with Mr. Lattie, Kirk Richardson, Maria Hobson and I attended a presentation by Magna Electronics at the Ford Proving Grounds in Romeo, Michigan. After that, we hurried back for the township meeting that night. Kirk, Maria Hobson, Debbie Barriger and I met Wednesday to go over what we needed for the reports on the federal energy grant. Friday started the first day of the 312 arbitration. Monday and Tuesday of the next week were arbitration hearings all day and Wednesday was a day for catching up and getting things done before the long 4th of July weekend. Hope you have have a glorious Fourth of July celebration.
